

# Shadowing Practice Sheet

## 새도잉 연습지

Shadowing means repeating audio out loud a split-second after you hear it. It trains your ears and mouth at the same time — the fastest route to natural pronunciation.

### How to shadow (10 minutes)

- Pick a short clip (10-20 seconds) with a transcript.
- Listen twice without speaking, just absorbing the rhythm.
- Play again and speak **along** with the speaker, matching intonation.
- Record yourself and compare — focus on melody, not perfection.
- Repeat the same clip daily for a week before moving on.
